METADEFENDER™

Kiosk Desktop

Removable Media Security Kiosk

Stop breaches at the point of entry and help your organization mitigate removable media threats and meet compliance, in one easy to use appliance. The MetaDefender Kiosk Desktop is out of the box and deployed in just minutes, protecting your network perimeter from the threats of portable media.

Key Features

Advanced Threat Detection

Scan files with multiscanning technology powered by over 30 anti-malware engines, threat detection levels can exceed 99%.

Country of Origin Check

Gain insights and create policies based on country of origin for files and content.

File Vulnerability Assessment

Uncover vulnerabilities in installers, binaries, or applications before installation to plug any security holes.

File Storage & Data Diode

Integrates seamlessly with local, network, or cloud storage, MetaDefender Managed File Transfer, NetWall, and best-in-class data diode providers for secure data transfer and storage.

Media Validation Agent

Validate digital signatures every time media is inserted into a device, blocking unscanned media from accessing your environment.

Supports Common Media Types

USB Type-A, USB Type-C, SD, Micro SD, and CD/DVD

Privacy and Confidentiality Protection with DLP

Detect and block sensitive data and personally identifiable information (PII).

Clean & Reconstruct Suspicious Files

Remove suspect data from common file types, outputting sanitized and usable files with Deep CDR.

Scan Encrypted Drives

Comprehensively scan and sanitize a variety of encrypted drives.

Multiple File System & Virtual Disk Support

FAT, NTFS, Ext, HFS+ & APFS; VHD & VMDK.

Secure Erase

Wipe portable media completely clean, before loading approved content.

□ Central Management

Simplify Kiosk management in the cloud and on-premises.

METADEFENDER KIOSK DESKTOP
